FOREWORD

It is my privilege to present the 25th edition of Bureau's annual report 'Finger Prints in India' for the calendar year 2021. 'Finger Prints in India' is a compendium of endeavors of the Central and State/UT Finger Print Bureaux (SFPBx) in the discipline of Fingerprint Science. The 'Finger Prints in India' is being published by NCRB since the year 1997.

This publication contains details of the important cases solved by the Central Finger Print Bureau (CFPB) as well as State Finger Print Bureaux (SFPBx) through scientific tools and techniques. It also carries information on transactional activities of State FPBx such as number of visits of experts to scenes of crime, number of chance prints lifted from those sites, number of convict's fingerprints enrolled, number of arrestee's slips processed to ascertain their criminal history, number of document cases examined and expert opinion furnished, etc. Statistics contained in this publication regarding fingerprints will help law enforcement agencies, academicians, scholars, researchers etc. to develop a better understanding of the Finger Print infrastructure in the country.

A new chapter on "National Automated Fingerprints Identification System (NAFIS)" has been introduced in the publication from this year. NAFIS, a flagship project of the Bureau has been launched in the country to create a searchable database of criminal fingerprints at Central Level.

The Bureau is proud to inform that the NAFIS hardware has been delivered and installed in all the State Finger Print Bureaux and District/Commissionerates. Implementation of NAFIS will empower the law enforcement agencies with a central repository of criminal identification data, where a large database of fingerprints is made available to them in real time basis. With the system, the chance prints as well as arrestee slips will now be online processed at every District Headquarters itself.

I am sure that the present edition of this annual report will make both an empirical and analytical contribution to the field, with the overall aim of maximising the evidentiary value of Finger Prints in the Criminal Justice System. I am grateful to all State/UT Finger Print Bureaux for the co-operation extended to the Bureau in ensuring timely publication of the report. I, also take this opportunity to appreciate the staff of Central Finger Print Bureau of NCRB for their efforts in bringing out this publication.

This publication also presents other useful information such as relevant laws, equipments and relevant books, all at a glance, enabling the readers to equip themselves with the latest developments in the field.

Chapter I - ACTIVITIES OF CENTRAL FINGER PRINT BUREAU

In the calendar year-2021, a total of 338 document cases were received from different Government agencies like CRPF, Post Offices, Staff Selection Commission, Banks, Railway Recruitment Boards etc. Along with 30 cases pending from previous year, 368 cases were available for examination. Fingerprint Experts at CFPB have examined and furnished their expert opinion in 173 cases during the year 2021.

In the NAFIS Project, Work Stations were provided to all SFPBx and NAFIS software was installed and commissioned in SFPBx. The soft launch of NAFIS software was done on 28th July, 2021 for testing the application for its various functionalities. The officers of States/UTs were imparted training by CFPB team for familiarizing them about NAFIS functionalities.

XXII All India Conference of Directors of Finger Print Bureaux was organized on 28th & 29th October, 2021, at National Crime Records Bureau (NCRB), New Delhi, through online platform. Delegates from various Finger Print Bureaux, CFSL-CBI, NIA, FSLs, students from Colleges and Universities offering Forensic Science and Criminology course participated in the conference. All India Board Examination for Finger Print Experts (AIBE) 2020 which was postponed due to Covid-19 pandemic was held on 20 to 23 February, 2021 and AIBE 2021 was held from 04 to 07 December, 2021.

Chapter II - ACTIVITIES OF STATE FINGER PRINT BUREAUX

Important cases solved by the Fingerprint Experts of State Finger Print Bureaux are highlighted in this chapter. Although States/UTs after examination submitted 109 cases, 73 are selected for publication based on the sensitivity, value of property lost/recovered, detection of a series of cases etc.

Main responsibility of a FP expert is to develop chance prints left by criminals at the crime scene and to match these with the fingerprints of the criminals. Further, FP experts also receive fingerprint slips of arrested persons for providing the criminal records by comparing fingerprints database. In the year 2021, Finger Prints Units of the SFPBx/Police/Other Staffs have visited 52,602 crime scenes and they have developed 70,204 chance prints, out of which 53,281 Chance Prints found fit for comparison. A total of 2,961 cases have been solved through chance prints.

Chapter III - TRANSACTIONAL ACTIVITIES OF CFPB AND SFPBx

States/UTs have total 89,40,272 convicted and arrested Ten digit Finger Prints database as on 31.12.2021. During 2021 CFPB had examined 2,346 chance prints cases in which 409 chance

prints traced out of 4,672 chance prints.

A total number of 1,409 document cases were received and 807 cases were pending in the SFPBx, of which 1,506 cases were examined by FP experts and 10 cases were returned. In 108 cases, FP experts from various SFPBx deposed in the Courts of Law for testimonies. Total 700 cases are pending at the end of the year. Following table shows the All India Statistics of the finger print transactions in States/UTs during 2021.

50,575	6,18,842	1,409	53,281	2,961

Chapter IV - ANALYSIS OF FP TRANSACTIONAL ACTIVITIES

This chapter deals with the analysis of concomitant factors such as conviction rate, reasons of discrepancies in the data provided and inter-comparison of data procured from the State Finger Print Bureaux along with the depiction of major activities such as Record slips, Search slips, Document cases, Chance prints and also categorization of crimes under various heads at a glance.

State of Madhya Pradesh has highest number of fingerprint slips recorded in the year 2021 for conviction of criminals for murder, grievous hurt, rape and attempt to murder. On an average Punjab, Maharashtra and Gujarat have recorded good number of conviction slips. States such as Gujarat, Madhya Pradesh and Maharashtra have recorded the highest number of arrestee slips and some other States including Uttar Pradesh, Bihar, Jharkhand, Chhattisgarh, Kerala, Rajasthan and West Bengal have recorded lesser number of FP arrestee slips as compared according to their population and number of crime incidences. Punjab, Tamil Nadu, Rajasthan, Telangana & Karnataka examined more than 100 document cases in the year 2021. Karnataka, Andhra Pradesh and Telangana States have topped the list with highest number of chance print cases identified in the year 2021. On further analysis, it was found that record slips of those convicted for Murder, Grievous Hurt, Attempt to Murder and Rape are the highest in number as compared to other IPC heads whereas the no. of search slips recorded also demonstrate a sharp rise for crimes such as Grievous hurt, murder, attempt to murder and assault on women. In cases of Property related crimes, the number of persons arrested and convicted for the offence of other IPC is higher than those involved in each of theft, burglary, robbery, and dacoity. The number of persons arrested and convicted for NDPS come second after other Special and Local Laws (SLL) crimes. States of Madhya Pradesh and Punjab received the highest number of conviction slips.

Chapter V- National Automated Fingerprint Identification System (NAFIS)

This chapter gives information on various aspects of NAFIS software such as Introduction, work flow of NAFIS and status of NAFIS till 31st Dec 2021 in different States/UTs. Under the NAFIS Project, 1,322 Work Stations were to be provided to all SFPBx, Commissionerates & Districts. By the end of 2021, NAFIS solution was installed in 1,273 Work Stations in SFPBx, Commissionerates and Districts and of them, 752 were commissioned. CHAPTER-I

ACTIVITIES OF CFPB

ACTIVITIES OF CFPB

The Central Finger Print Bureau is an apex body in the country which co-ordinates, guides, monitors, and provides technical support to the State Finger Print Bureaux, as well as investigation agencies and international organizations like INTERPOL in all matters related to Finger Print Science.

On the recommendation of the National Police Commission in the year 1986, CFPB fingerprint database was automated by gradually digitizing the existing manual records with the installation of the country's first Automated Fingerprint Identification System (FACTS 1.0) in 1992 at NCRB HQ, New Delhi. Automation of the fingerprinting technology has been the agenda of scientific and industrialist peers in order to provide the law enforcement agencies with the best of the tools and techniques to maintain highest possible decorum of law and order. As there is a need of fast and robust system to handle large number of data and cope up with latest emerging trends in the era of Finger print science, MHA has directed to procure latest system for replacement of FACTS in the country. NCRB has conceptualized and implementing National Automated Finger Print Identification system (NAFIS), a robust system which will be a game changer for the Finger Print Fraternity & will enable the State/UTs/Law Enforcement agencies to upload/trace/retrieve their data in real time on a 24X7 basis on the server placed in the NCRB.

As NAFIS being implemented, FACTS-5 server was terminated and complete work flow has been switched to NAFIS. As on 31.12.2021, NAFIS has a data base of 50, 36,543 of migrated data from various State/UTs.

The Bureau imparts training in various aspects of Finger Print Science to police and non-police personnel of States/UTs. The Bureau is also mandated to conduct All India Board Examination (AIBE) annually for the accreditation of Finger Print Experts. All India Conference of Directors of Finger Print Bureaux of States/UTs is also organized by CFPB. The conference provides a forum for Finger Print professionals to deliberate on recent advancements in the field of Finger Print science and other issues concerning the Finger Print fraternity of the nation. CFPB has a branch at Kolkata which is mainly organizing training courses for the North Eastern States.

A. National Automated Finger Print Identification System (NAFIS)

National Crime Records Bureau (NCRB) is implementing National Automated Fingerprint Identification System (NAFIS), a web-based application, conceptualized for establishing a central repository of criminal fingerprint data generated in States/UTs in India and is being implemented on the principles of cloud computing. NAFIS also provides facilities for integration for States/UTs with their own NIST compliant Automated Fingerprint Identification Systems (AFIS) to replicate their data to the central server. NAFIS is integrated with other applications like CCTNS.

The NAFIS project will improve fingerprint processing capability along with the possibility of integration with other biometric devices in future. The provision of portable live

scan devices would make it possible to bring fingerprint-based identification to mobile sites. Fingerprint slips obtained in police stations and digital fingerprints enrolled at districts will be stored in dedicated virtual partitions allotted to each State/UT in NAFIS server established at NCRB Hqrs through hardware and software provided by NCRB. Only authorized users from States/UTs can edit/modify/search its data stored in the exclusive space allotted to them, ensuring the ownership of data remains with the concerned State/UT.

NAFIS soft launch was done on 28th July, 2021 extending access of its functionalities to all Finger Print Bureaux (FPBx). Central Finger Print Bureau (CFPB) has imparted training to the FP experts of States/UTs for using the application. Subsequently, a large number of latent fingerprints-hitherto untraced- received from SFPBx during past years had been processed by finger print experts of CFPB through NAFIS. Out of a total of 4,672 latent prints from 2,346 different cases, 409 latent prints were traced assisting in solving 316 cases.

B. Important Document Cases solved at CFPB, New Delhi

In these cases, withdrawal vouchers of various depositors bearing fingerprints were received to be compared with the specimen fingerprints present on relevant claim forms and written statements of the depositors. Most of the questioned prints were of decipherable quality but the specimen prints were slightly poor quality. Finally, the specimen prints of decipherable quality were selected for examination and the impersonation in the cases were established by CFPB experts.

III. CFPB had received 09 document cases from Assistant Commandant, Eastern Zone Headquarters, Central Industrial Security Force (CISF), Patliputra Colony, Boring Road, Patna, Bihar and 13 cases from Chairman of Dossier Scrutiny Board, CISF UNIT, Tajmahal Agra, regarding impersonation in recruitment. In these cases, the Admission Certificates (Commission's Copy) of suspected candidates bearing questioned left thumb fingerprints were received to be compared with the specimen fingerprints. The questioned left thumb impressions were examined by experts of CFPB and established conclusive impersonation.

**Graph No. 1 Number of Finger Print Record (Conviction) Slips Recorded in the Year 2021 (State Wise)****Graph 1**

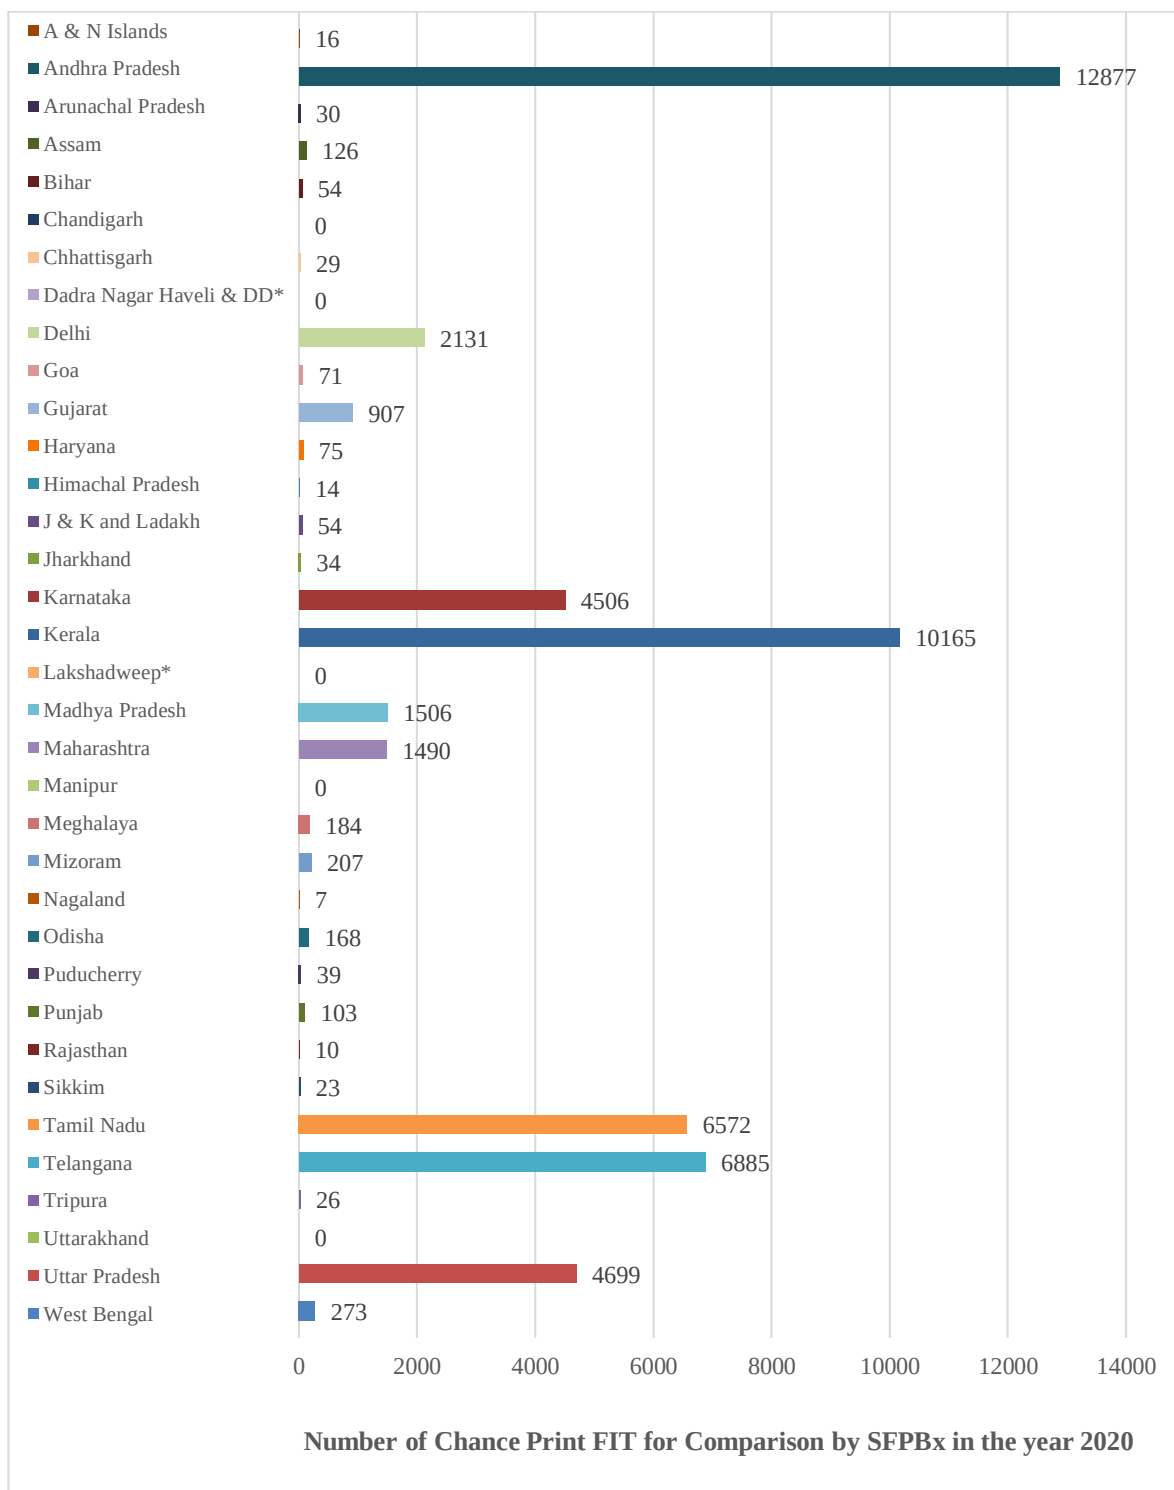

The States such as Madhya Pradesh, Maharashtra and Punjab, have recorded more than 09 thousand and Gujarat has recorded more than 07 thousand conviction slips during 2021. Likewise, the states Haryana, Tamil Nadu and Uttar Pradesh have recorded more than 02 thousand conviction slips. Delhi is the only UT has recorded more than 01 thousand conviction slips. **Graph No. 2 Number of Finger Print Search (Arrestee) Slips Recorded in the Year 2021 (State Wise)****Graph 2**

States such as Gujarat, Madhya Pradesh and Maharashtra have recorded the highest number of arrestee slips. The point to be speculated is that some of the other States including Andhra Pradesh, Delhi, Haryana, Karnataka, Punjab, Odisha, Tamil Nadu and Telangana have recorded ample number of FP Arrestee slips as compared according to population and number of crime incidences. Apart from that, 06 State/UTs have not recorded search slips. Some of the States/UTs are under the process of maintenance/upgrading their AFIS.

**Graph No. 3 Number of Document Cases Examined in the Year 2021 (State Wise)****Graph 3**

The States of Tamil Nadu, Punjab, Rajasthan, Karnataka, Telangana and Maharashtra in decreasing order, have examined more than hundred document cases in the year 2021. These higher numbers of cases examined may also be related to their corresponding higher population. As States/UTs such as Assam, Nagaland, Himachal Pradesh, Tripura, Puducherry, Jharkhand, Goa, and Arunachal Pradesh have examined less number of cases.

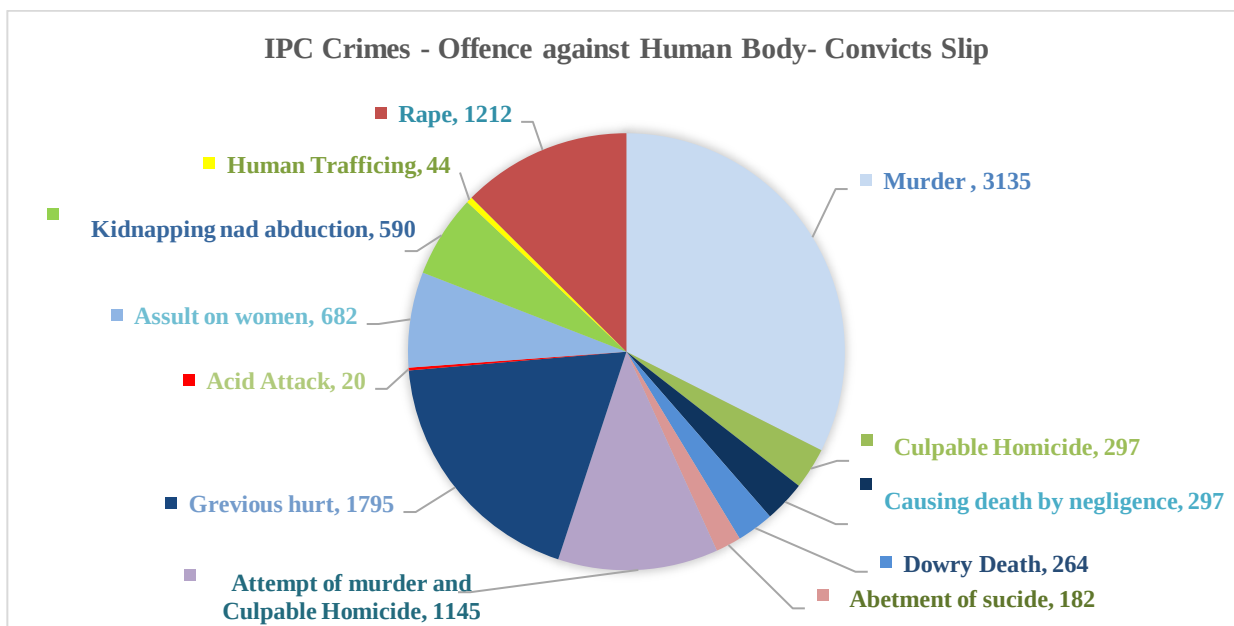

**Graph No. 4 Number of Chance Prints Fit for Comparison in the Year 2021 (State Wise)****Graph 4**

States of Andhra Pradesh, Karnataka, Kerala, Tamil Nadu, Telangana, and Uttar Pradesh have topped the list with highest number of chance prints developed fit for comparison in a calendar year 2021. Other bigger States like Madhya Pradesh and Maharashtra are less no. of fit chance print developed during this year. Delhi is the only Union Territory to have developed a large number of chance prints.

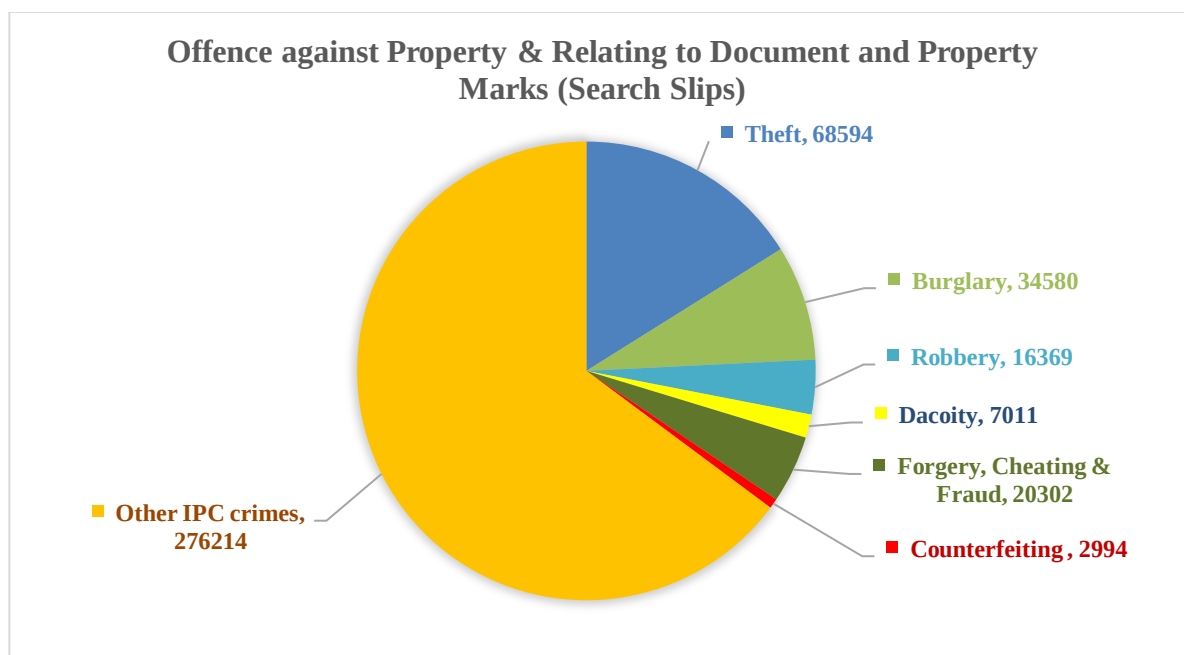

Graph 6 & 7

Record slips of those convicted for Murder, Grievous Hurt, Attempt to Murder and Rape are the highest in number as compared to other IPC crimes whereas the search slips recorded also demonstrate a sharp rise in crimes such as Kidnapping, Abduction and Assault on women. The number of Search slips for all the heads of crime is higher than the number of conviction slips recorded.

Graph No. 8 IPC Crimes - Offences against Property & Relating to Document and Property Marks (Record Slips)

Graph No. 9 IPC Crimes - Offences against Property & Relating to Document and Property Marks (Search Slips)

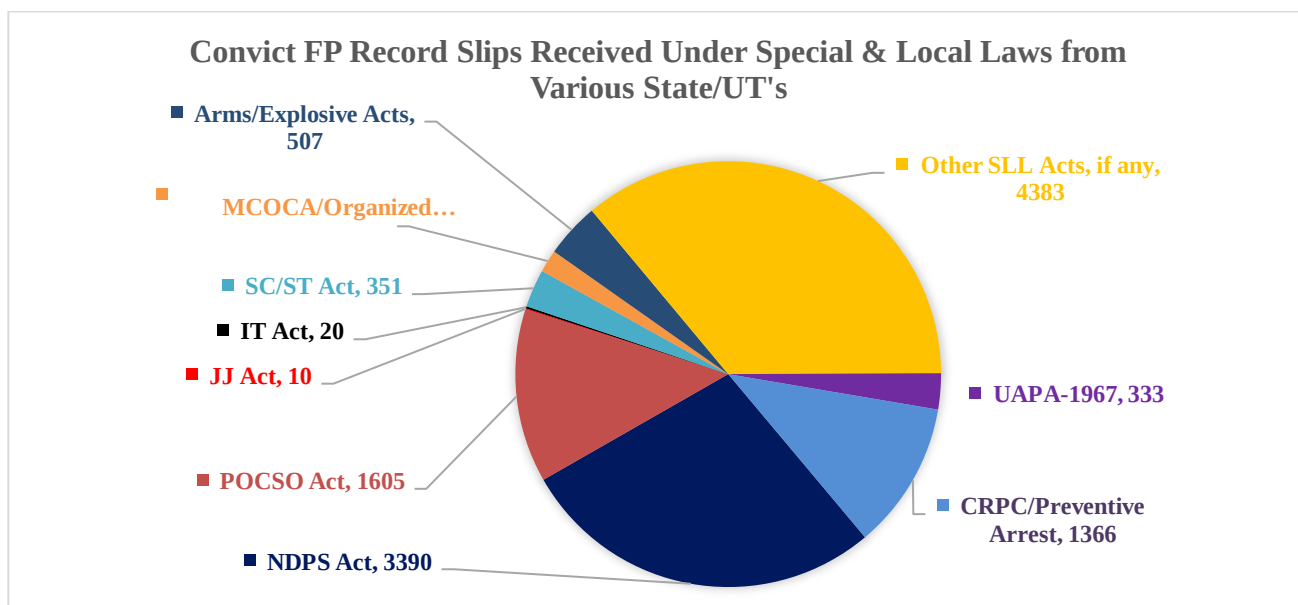

Graph 8 & 9

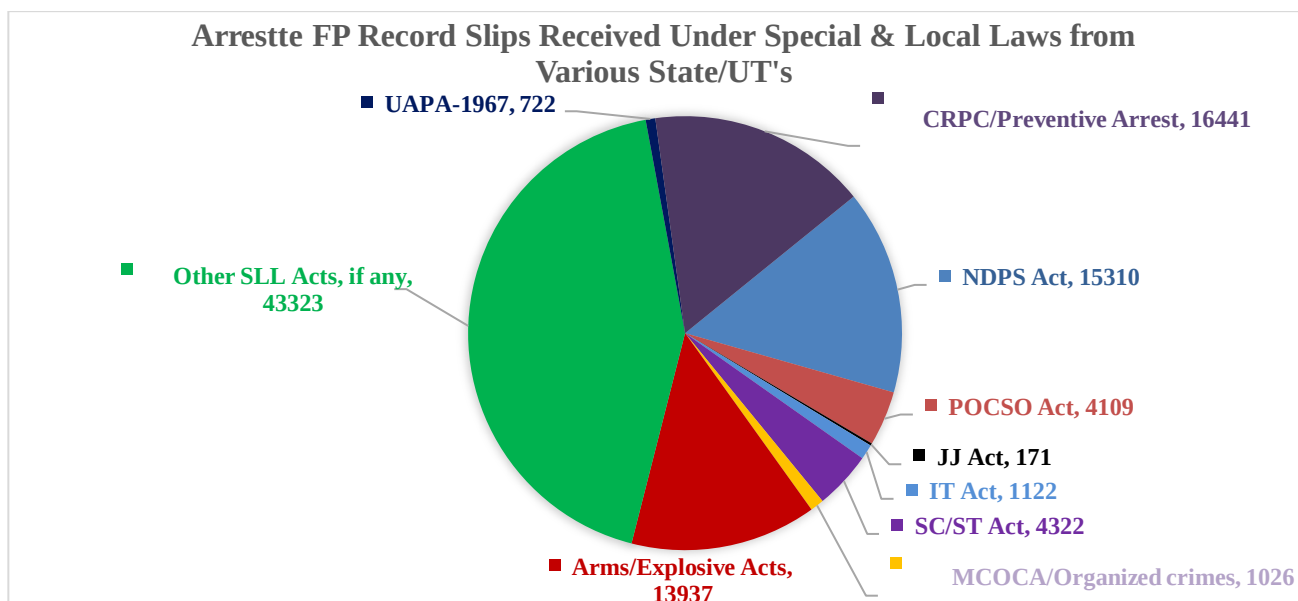

The number of persons arrested and convicted for the offence of Theft is higher than those involved in Robbery, Burglary and Dacoity. In document related offences, more number of persons has been arrested and convicted for forgery rather than counterfeiting. As 'other IPC' crime head involves the rest of the IPC sections, it has documented more number of crimes than rest of the crimes combined.

SLL Acts and NDPS Act top the list with more the number of persons arrested and convicted, followed by Cr.PC /Preventive arrest and Arms/Explosive Acts, and POCSO Acts are in the descending order. When compared to others, SC/ST Act, UAPA Act, IT Act and JJ Acts are less number of arrested and convicted persons with decreasing numbers. Graph 10 &11 highlights the fact that the number of persons arrested for a certain crime is always higher than those who get conviction from the court of law.

NATIONAL AUTOMATED FINGERPRINT IDENTIFICATION SYSTEM (NAFIS)

NATIONAL AUTOMATED FINGER PRINT IDENTIFICATION SYSTEM (NAFIS)

NAFIS serves as the key application, for Fingerprint experts/personnel for performing crime and criminal investigation functions, implemented and managed by the Central Finger Print Bureau (CFPB) at NCRB, New Delhi. It has been conceptualized for establishing a central repository of criminal fingerprint data generated in India and is implemented on the principles of cloud computing model.

Fingerprint slips obtained in police stations and digital fingerprints enrolled at districts will be stored in dedicated virtual partitions allotted to each State/UT in NAFIS server established at NCRB Hqrs through hardware and software provided by NCRB. Only authorized users from States/UTs can edit/modify/search the data stored in the exclusive space allotted and thereby ownership of data lies with the concerned State/UT only.

NAFIS also provides facilities for integration for States/UTs with their own NIST compliant Automated Fingerprint Identification Systems (AFIS) to replicate their data to the central server. NAFIS is integrated with other applications like CCTNS.

NAFIS application facilitates integrated palm print, fingerprint enrolment and portrait capture, storage and matching.

Objectives:

- To create a searchable national repository of criminal fingerprints and palm prints.
- To enable national level searches from all NAFIS workstations installed across the country.
- To enable chance print searches from Districts/Police Commissionerates/Fingerprint Units using national database.

- To bring all States/UTs in the same platform for the use of fingerprints/palm prints in tracing criminals, solving crimes and mapping criminal history.
- To reduce delays in investigation due to logistics of physical flow of slips for manual verification (State FPB to CFPB & Back) by providing real-time results.

National Fingerprint Number (NFN):

A unique fingerprint reference number is assigned by NAFIS for each criminal. Entire criminal history can be found out from NFN.

- 10 digit NFN for each criminal based on biometrics
- Multiple incidents, one ID
 - One ID for lifetime for one criminal.
 - Different crimes registered under different FIRs as incidents belonging to same NFN.
 - Crimes of same criminal registered in different States/UTs under same NFN.
- State Ownership
 - Each criminal registered in a particular state has first 2 digits of state code in alphabets, followed by a sequence number.
 - State partition will have IDs belonging to state (For e.g., **UP00001234**, **MP00000007**).

Authorized NAFIS Users:

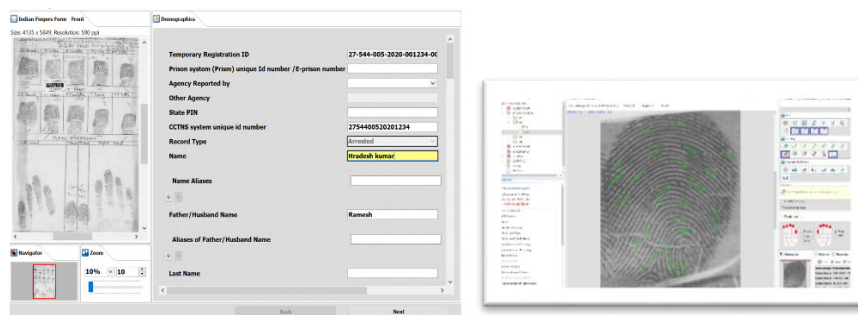

There are four types of User in NAFIS with well-defined privileges, namely:

- **Enrolment User:-** Any Officer trained in taking finger prints and is provided rights for live enrolment and slip capture.
- **Ten Print Expert:-** Junior expert trained in taking and matching of finger prints and is provided rights for live enrolment, slip capture and ten print-ten print matching.
- **Chance Print Expert:-** Senior expert trained in taking and matching of finger prints and is provided rights for live enrolment, slip capture, ten print matching and chance print matching.
- **System Administrator:-** Senior expert trained in taking and matching of finger prints and is provided rights for live enrolment, slip capture, ten print matching and chance print matching. In addition, this user will be able to generate various reports of transactions and track activities of various Users within his/her State/UT.

Applications under NAFIS:

MBIS: Morpho Biometric Identification System

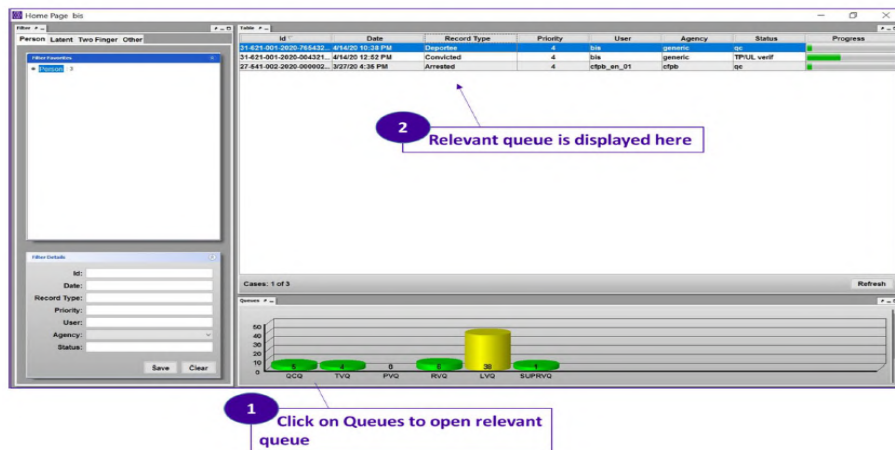

MBIS is an automated biometric identification system (ABIS) that allows acquisition, storage and search of biometric data of persons (like fingerprints, palm prints, portraits). It has chance print and slip capture application which enables scanning of fingerprint slips and chance prints using flat-bed scanners provided with each NAFIS workstation. It also has numerous tools for enhancing the quality of chance prints so as to increase the probability of matching. MBIS is also equipped with advanced technologies for extraction of finger/palm prints images from variety of backgrounds like curved surfaces, revenue stamps, etc and separation of overlapped fingerprints.

MBIS consists of following applications

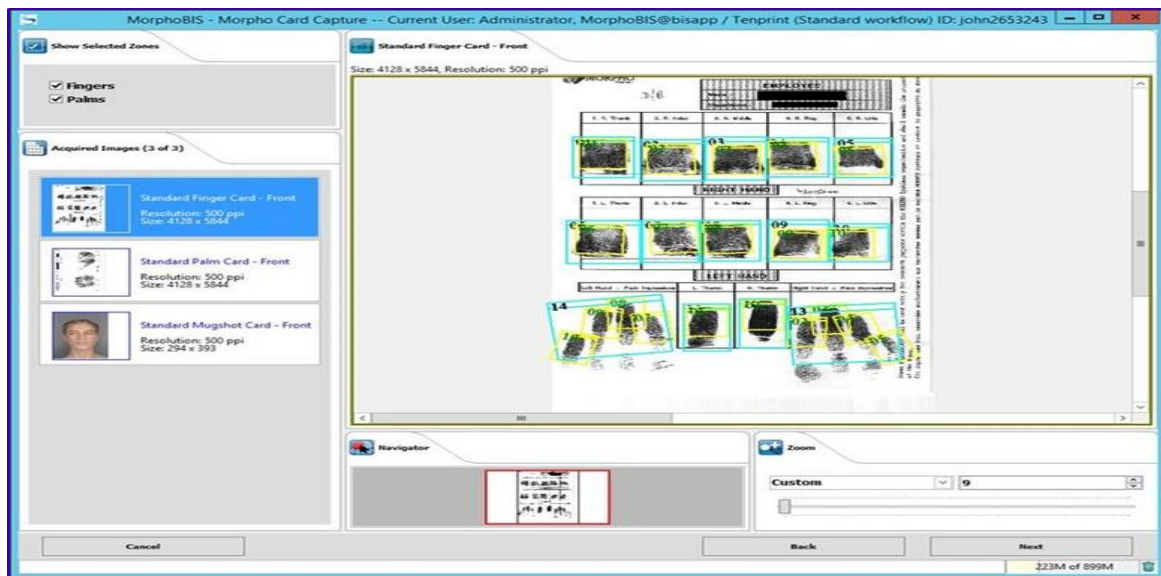

1. Home Page

- Shows a list of records that are in progress
- Create filters on queues
- Perform quality control
- Perform verification

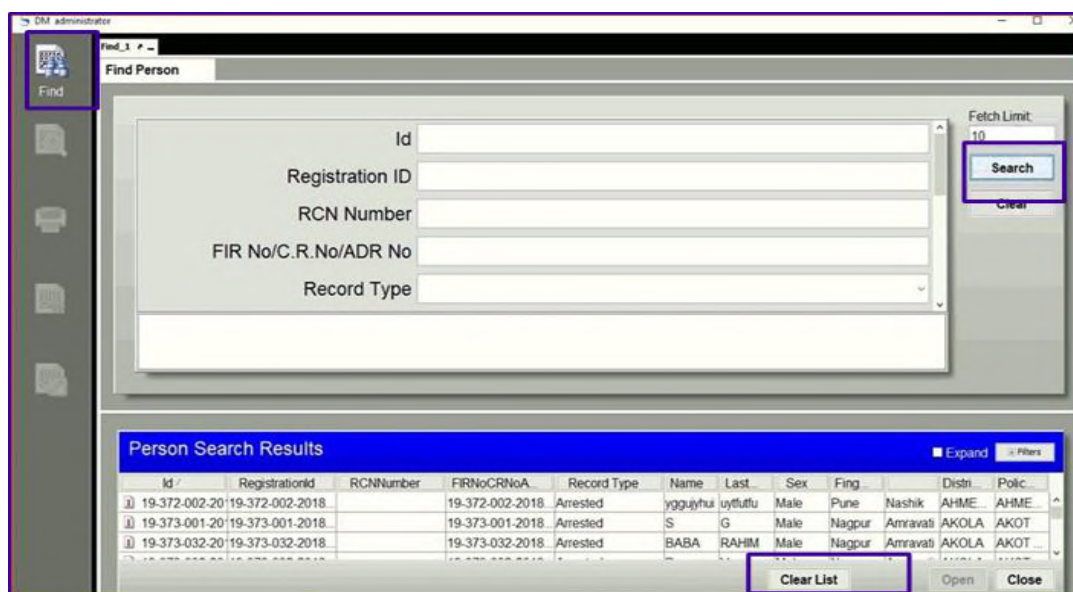

2. Slip Capture

- Used for capturing physical slips (legacy data)
- Acquire Persons, with alphanumeric data and scanned or imported print images,
- Launch searches against the databases of the system.

3. Database Maintenance

- This application enables fetching of previous antecedents using NFN, State PIN etc.
- Find the records, Edit the records, Relaunch searches, Print a person's record, Delete a person's record, Export a person's record to NIST file.

4. Chance Print Expert

- Acquire cases, with demographic data and scanned or imported images of latent prints found on the scenes of crime.
- Launch searches against the different databases of the system,
- Edit the cases of the database (prints, demographic data, historic of searches, etc.)

5. Other applications:

It also consists of Charting, Compare Records and Central Viewer tool, which are used to prepare charts, compare two records and access reports.

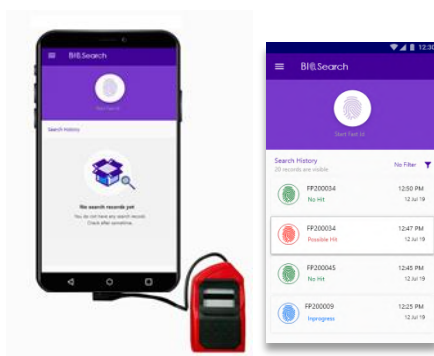

MESA: Morpho Enrolment Software Application.

- MESA is a live enrolment application which captures biometrics (fingerprints, palm prints and face etc.) along with demographics details.
- Quick search is used to launch search with two thumbs to get possible HIT or NO HIT results from the national criminal database.
- MESA application is integrated with CCTNS (Crime and Criminal Tracking Network and Systems) for fetching demographic details from CCTNS server and it reduces the efforts of the operator.
- MESA can work on both online as well as offline mode.

Bio Search (Mobile App):

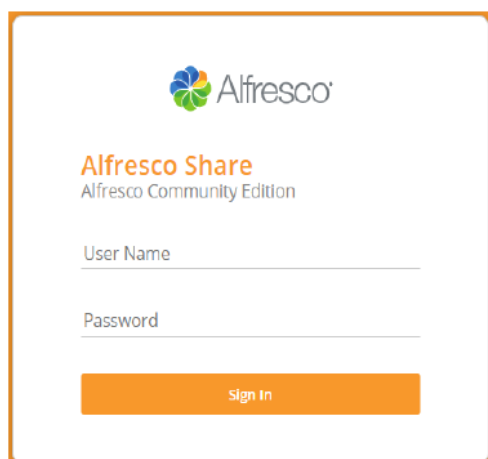

- NAFIS Bio Search is an Android application to perform national level fingerprint search with a two fingers, which is also called Fast ID Search.
- Its user must be authorized to use the application and can perform Fast ID search using single fingerprint scanner (MSO device) to get possible HIT or NO HIT results from the national criminal database of fingerprints.
- Users of this android application will be Police Personnel who are on duty in the field. This application will be used pan-India.

Alfresco Share – A DMS Solution for NAFIS:

Document Management System helps to store, access, manage, control and track electronic documents and electronic images of paper-based information that has been captured through document scanning technology. Document Management System is similar to what you use for personal use to store files by organizing them in folders. Some well-known applications are: Drop box, Google Drive etc.

- Alfresco makes it easy to quickly locate the exact NAFIS document they need from among many thousands of files, in their document management system.
- Easily find, share and secure all important files such as Digitized Slips, etc.
- Files can be easily searched and downloaded for offline use.
- Alfresco Share is a rich web-based environment for managing documents, content etc.

CAPACITY BUILDING

CAPACITY BUILDING

TRAINING AND CAPACITY BUILDING IN FINGERPRINT SCIENCE AT CFPB, NCRB, NEW DELHI

One of the objectives of CFPB is to provide training in Finger Print Science for capacity building of Police Forces in the country. Every year CFPB conducts various training programs for Indian Police Officers at CFPB Delhi and Kolkata Branch. CFPB, Delhi had conducted training on the Basic Course and refresher course on Finger Print Science and also conducted 'Training of Trainers' which has increased trainers/resources, persons, in police/FPBx, are attended by officers of all ranks including senior officers from States / Union Territories as well as from Central Police Organizations/Central Armed Police Forces. Besides training of Indian Police Officers, CFPB, Kolkata imparted one-day training to government officials who would deal with fingerprints. In the year 2021, CFPB fingerprint experts have been deputed impart trainings to States/UTs staff by for smooth functioning of NAFIS.

Annexure-I**PIONEERS OF FINGERPRINT SCIENCE**

There are records of fingerprints being taken many centuries ago. Ancient artifacts with carvings similar to friction ridge skin have been discovered in many places throughout the world. The ancient Babylonians pressed the tips of their fingertips into clay to record business transactions. Thumbprints were used on clay seals in China to “sign” documents. A petro glyph located on a cliff face in Nova Scotia depicts a hand with exaggerated ridges and finger whorls, presumably left by the Mi'kmaq people.

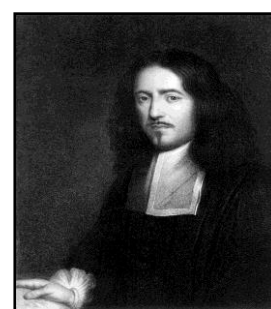

With the advancement in the field of Identification/ Investigation, many of the Scientists/ Investigators worked, whose contributions are listed below:

Dr. NEHEMIAH GREW (1641-1712)

- English Plant Morphologist, Considered as “Father of Plant Anatomy”.
- Studied and described the ridges, furrows, and pore structure of friction skin.
- Published very accurate drawings of the Finger Print patterns and areas of the palms.
- Did not address uniqueness or permanence of the ridges.

**MARCELLO MALPHIGHI (1628-1694)**

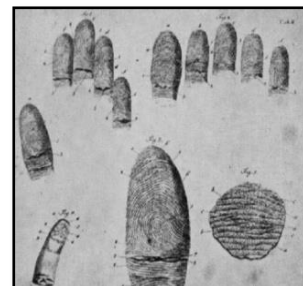

- First to see the capillaries and was a founder of histology, embryology, plant anatomy, and comparative anatomy.
- Used a microscope for the first time to examine friction skin and made observations as to its structure.
- Malpighian layer of skin named after him, for his research contributions.
- Did not address uniqueness or permanence of friction ridges.

**Dr. J.C.A. MAYER (1747-1801)**

- Authored a book on human anatomy and anatomical illustrations. The book is one of the earliest recordings supporting the uniqueness of fingerprints.
- The book included drawings of friction skin and this is still a valid statement ;

“Although the arrangements of skin ridges are never duplicated in two persons, nevertheless the similarities are closer among some individuals. In others the differences are marked, yet in spite of their peculiarities of arrangement all have certain likeness.”

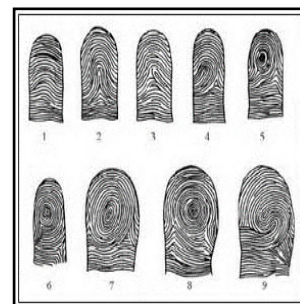

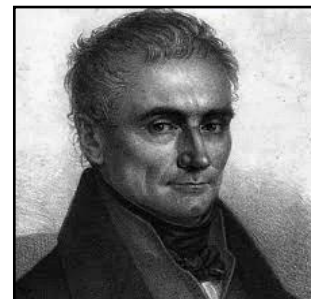

This statement has been verified by all other medical and scientific researchers of friction skin.

Dr. JOHANNES E. PURKINJE (1787–1869)

- At Breslau he created the world's first Independent Physiology department and the first official Physiology laboratory.
- He discovered the Purkinje effect, Purkinje cells, and Purkinje fibers.
- He was the first to give regular classification of Fingerprint patterns into nine categories which is as follows:

➤ A: Transverse curves,	➤ F: Spiral,
➤ B: Central longitudinal stria,	➤ G: Ellipse or elliptical whorl,
➤ C: Oblique stria,	➤ H: Circle or circular whorl, and
➤ D: Oblique sinus,	➤ I: Double whorl
➤ E: Almond	

WILLIAM JAMES HERSCHEL (1833-1917)

- He experimented with the idea of using a hand print as a signature by a man named Rajyadhar Konai put a stamp of his right hand on the back of a contract. The contract was received and accepted as valid.
- He instituted taking fingerprints of both pensioners and criminals so that it is not carried out by imposters.
- He was the first person to use Hand Prints/ Fingerprints officially.
- He published an account of his work entitled 'The Origin of Fingerprinting'.

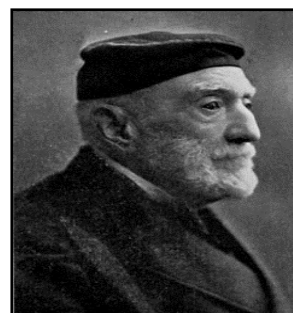

Dr. HENRY FAULDS (1843–1930)

- British surgeon and Superintendent of Tsukiji Hospital in Tokyo.
- Wrote an article that discussed fingerprints as a means of identification.

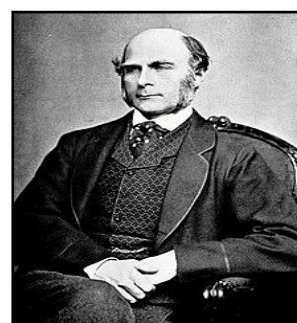

- He published a paper on the subject titled 'On the Skin-Furrows of the Hand', in the scientific journal 'Nature' and it was the first scientific literature to suggest the basic concepts of the fingerprint system of identification.
- In an article, Faulds proposed using friction ridge individualization at crime scenes and gave two practical examples.
- Recommended Printer's Ink for recording of fingerprints.

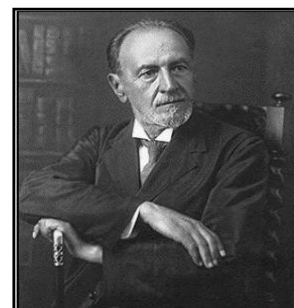

SIR FRANCIS GALTON (1822-1911)

- He was an English explorer and anthropologist best known for his research in Eugenics and Human Intelligence.
- Established that friction ridge skin was unique and persistent.
- Defined & Named each Peculiar characteristics /Minutiae/ Ridge Characteristics
- Wrote book on "Fingerprints" in 1892 and "Decipherment of Blurred Fingerprints"

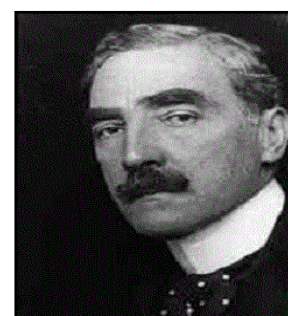

IVÁN (JUAN) VUCETICH (1858-1925)

- His classification system and individualization of prisoners through the use of fingerprints were the first practical uses of the Finger Print science by law enforcement personnel.
- He made the first positive identification of a criminal in a case where Francisca Rojas had killed her two children and then cut her throat, trying to put the blame on the outside attacker. A blood print identified her as the killer.

SIR EDWARD RICHARD HENRY (1850-1931)

- Inspector General of Police for the Lower Provinces in Bengal.
- Considered as Father of Modern Finger Print Science.
- With the help of Indian Police Officers Khan Bahadur Azizul Haque, and Rai Bahadur Hem Chandra Bose, the Henry classification system was developed.
- Went before an inquiry committee to convince them to change to fingerprinting of criminals instead of using the Bertillon Method.
- Established the Metropolitan Police Finger Print Bureau, which

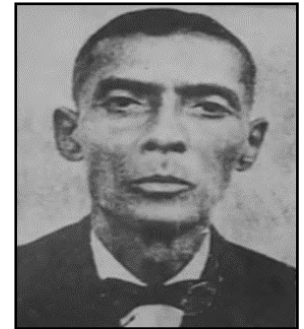

Was Britain's first.

- Published a book “The Classification and Use of Finger Prints.”

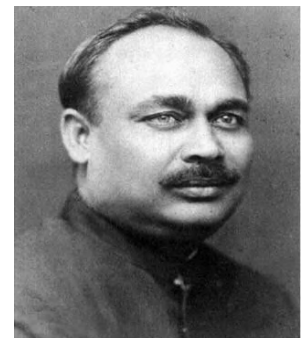

HEM CHANDRA BOSE (Born in 1867)

- An officer of the Anthropometric Bureau in Calcutta
- Created a system for single digit impression
- Created a telegraphic code for communicating classification.
- Was awarded the title “Rai Bahadur”
- Wrote a book called “Finger Print Companion”

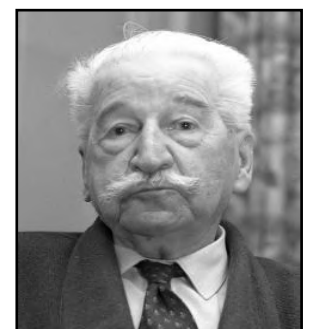

AZIZUL HAQUE (1872 – 1935)

- Officer-in-charge of the Anthropometric Bureau at Calcutta
- Helped in devising the classification formula on a mathematical basis.
- Was awarded the title “Khan Bahadur”
- Was awarded honoraria of rupees 5000/- for his contribution to the establishment of Finger Print classification.

EDMOND LOCARD (1877-1966)

- Formulated the basic principle of forensic science: "Every contact leaves a trace".
- Developed the science of Poroscopy.
- Established the first rules of the minimum number of minutiae necessary for identification. He said that if 12 specific points were identical between two fingerprints, it would be sufficient for positive identification.

Annexure-II

LAWS RELATING TO FINGERPRINTS IN INDIA

In this chapter contains all relevant legal information pertaining to Finger Print Science in India.

Section 45 of the Indian Evidence Act, 1872, as amended by Act V of 1899, defines:

Any other person whose finger prints are ordered to be maintained by the Govt. of India from time to time, subject to the provisions of the Identification of prisoners Act (act XXXIII of 1920).

"When the Court has to form an opinion upon a point of foreign law, or of science or art, or as to identity of handwriting or finger impressions, the opinions upon that point of persons especially skilled in such foreign law, science or art, or in questions as to identify of handwriting or finger impressions are relevant facts. Such persons are called Experts".

Section 293 of Cr. P.C. states as follows:

- 1) Any document purporting to be a report under the hand of a Government scientific expert to whom this section applies, upon any matter or thing duly submitted to him for examination or analysis and report in the course of any proceeding under this code may be used as evidence in any inquiry, trial or other proceeding under this code.
- 2) The Court may, if it thinks fit, summon and examine any such expert as to the subject-matter of his report.
- 3) Where any such expert is summoned by a Court, and he is unable to attend personally, he may, unless the court has expressly directed him to appear personally, depute any responsible officer working with him to attend the court, if such officer is conversant with the facts of the case and can satisfactorily depose in court on his behalf.
- 4) This section applies to the following Government Scientific Experts, namely:
 - a. Any Chemical Examiner or Assistant Chemical Examiner to Government.
 - b. The Chief Inspector of Explosives.
 - c. The Director, Finger Print Bureau.
 - d. The Director, Haffkine Institute, Bombay.

- e. The Director of a Central Forensic Science Laboratory or a State / UT Forensic Science Laboratory.
- f. The Serologist to the Government.

To ascertain, whether a finger print is that of a person by whom it purports to have been made, the court may direct any person present in the court to record his finger prints for the purpose of enabling the court to compare the finger prints alleged to have been made by such person. When given by recognized finger print experts, evidence as to the identification of persons by means of finger prints left at the scene of crime, is a fact. Summon from court is received whenever, court requires the services of experts either to prove the identity of the accused person or to give evidence in case in which experts opinion has already been furnished by the Bureau.

IMPORTANT COURT VERDICTS ON FINGER PRINT EVIDENCE

1. Supreme Court Ruling of 1961 : [State of Bombay Vs. Kathikalu Oghad AIR 1961 SC 1808]

A thumb impression of an accused taken by the police in course of investigation which was later on produced at the trial did not amount to testimonial compulsion under Article 20(3) and was not on that account inadmissible. It held that the application of finger prints in the identification of persons does not violate the fundamental rights under Article 20(3) of the constitution. It was further held that to be a witness in its wider sense means giving an oral or written statement but does not amount to exposing a part of the body for the purpose of identification.

2. Supreme Court Ruling of 1972 : [AIR 1972 SC 975]

“The comparison and identification of finger prints has developed into a science and the results derived there from have reached a stage of exactitude. As long as the report shows that the opinion was based on observations which led to a conclusion, such opinion can be accepted.”

“Unless there is a doubt as to the correctness of the opinion, the report of the examiner may be accepted without examination of the expert.”

3. Supreme Court Ruling of 1978: [Mohanlal Vs. Ajit Singh AIR July 1978 SC 1183]

The Hon’ble Supreme Court ruled that an opinion based on 08 identical ridge characteristics was fully justified and conformed to the views expressed in scientific books on the subject.

“Nothing substantial has been urged to challenge the opinion of the director of the Finger Print Bureau and all that has been argued is that as there were only 8 points of similarity, there was not enough basis for the expert’s opinion about the identity of finger prints. Reference in this has been made to B.L Saxena’s ‘Identification of handwriting, disputed documents, finger prints, foot prints and detection of forgeries’ (1968 edition, page 247), Walter R. Scott’s ‘Finger print mechanics’(page 62) and M.K. Mehta’s ‘The identification of thumb impression and the cross examination of finger print experts’ (second edition, page 28). We have gone through these books

but they do not really support the argument of the learned counsel for the respondent. While referring to the old practice of looking for a minimum of 12 identical characteristic details, Saxena has admitted that the modern view is that 6 points of similarity are sufficient to establish the identity of finger prints. Walter Scott has stated that as a matter of practice most experts who work with finger prints constantly satisfy themselves as to the identity with 8 or even 6 points.” The larger surface of the fully rolled impression not only allows accurate classification but it also gives more points for comparison. (For representative purpose only)

4. Supreme Court Ruling of 1979: [Jaspal Singh Vs. State of Punjab AIR 1979 SC 1708]

“The science of Finger print identification is an exact science and does not admit of any mistake or doubt.”

Annexure-III

Recommendations of XXII All India Conference of Directors Finger Print Bureaux held on online platform on 28th and 29th October, 2021

1. States requested for organizing training in physical mode, so that they will be able to use the NAFIS application more effectively. CFPB has agreed and accepted to start physical training from NCRB, as per the Govt. guide lines.
2. States suggested for establishment of a second Headquarters of CFPB in South India and zonal training centers as well as to explore the possibility of training in foreign countries on merit basis.
3. States requested for standardization in FPBx by providing lab facilities and consumables like powders for all States/UTs by CFPB/NCRB. It would ensure uplifting of the facilities.
4. Some States suggested for inspection of SFPBx by CFPB Officials. It was suggested that such visits for improvement of SFPBx will be arranged on requests from States/UTs.
5. States recommended for issuing of ID cards for FP experts with chips or barcodes.
6. States requested to explore the possibilities of deploying NAFIS system at port of entry/exit such as airports.
7. States suggested revising the requirement of minimum three years of experience in FP unit/Bureau to appear in AIBE to two years.

Annexure– VIII (c)

Glossary

- ❖ **AMPUTATED**- The removal of a limb or other body extremity by trauma, prolonged constriction or surgery.
- ❖ **ARTIFACT**- Any distortion or alteration not in the original friction ridge impression produced by an external agent or action. 2: Any information not present in the original object or image inadvertently introduced by image capture, processing, compressions, transmission, display, or printing. (SWGFAST2011)
- ❖ **AUTOMATED FINGER PRINT IDENTIFICATION SYSTEM (AFIS)**- An automated, minutiae-based identification system that may consist of two or more distinct databases comprising two-finger identification records and ten-finger latent cognizant records (records of individuals more likely to be found at crime scenes, for example, burglars). 2: A computer-based system for reading, cataloguing, searching, matching, and storing fingerprints and related data. (ANSI/IAI) 3: A generic term for a Finger Print matching, storage, and retrieval system. (SWGFAST2011)
- ❖ **ACE-V**- The process for identifying latent fingerprints, which involves Analysis, Comparison, Evaluation, and Verification:
 - a. Analysis is the qualitative and quantitative assessment of Level 1, Level 2, and Level 3 Details to determine proportion, interrelationship, and value for individualization.
 - b. During Comparison, the latent print examiner looks at the attributes noted during analysis for differences and agreement between the latent print and the known exemplar.
 - c. Evaluation follows extensive comparison by making a determination if two impressions were made by the same source, not from the same source, or if the information is inconclusive. (A determination is made as to the results of the Comparison process. The Finger Print community accepts three conclusions: (a) the latent print and known exemplar were made by the same source, (b) the latent print and known exemplar were not made by the same source, or (c) a conclusive comparison could not be determined. This could be due to a lack of comparable area in the known exemplar or lack of clarity due to improperly recorded known exemplars.)
 - d. Verification occurs when a second qualified examiner does an independent assessment of the latent print and known exemplar, utilizing the ACE process.
 - **ALGORITHM**- Mathematical routine used in computer processing. In AFIS processing, the matcher algorithm searches for relationships between the

search print and ten-print. 2: Mathematical routine used in computer processing, e.g., an AFIS matching algorithm establishes the correlation of Level 2 Detail between fingerprints. (SWGFAST). 3: A step-by-step computational procedure for solving a problem. The system computer and other system components use algorithms to make decisions required to process and handle information.(ANSI/IAI)

- **ANSI/NIST STANDARD-** Standard proposed by NIST and adopted by ANSI. For example, the ANSI/NIST-ITL standard Data Format for the Interchange of Fingerprint, Facial & Other Biometric Information is used by law enforcement, intelligence, military, and homeland security organizations throughout the world. The first version of this standard dates to 1986. Over the years, it has been updated and expanded to cover more biometric modalities beyond the original record type of Finger Print minutiae. (NIST).
- **BACKGROUND DISTURBANCE / INTERFERENCE-** A feature of the background (such as the texture or pattern) of the substrate (surface) that the mark is left on, which affects the appearance and resultant interpretation of the friction ridge flow or ridge details.
- **CADAVER-** A deceased person.
- **CHANCE PRINT OR SCENE OF CRIME PRINT-** means any chance or accidental impression left by friction ridges skin on a surface, regardless of whether it is visible or invisible at the time of deposition.
- **DISPATCH CHEQUE-**The details in triplicate prepared by the State Bureaux containing Name, Parentage of the convicts and Cheque No., Date and District of Origin of Finger Print Record Slips for forwarding the Finger Print Record Slips to other Bureaux are called Dispatch Cheques/Invoice.
- **DATABASES-** Collections of data and associated material designed to provide information rather than for archive, which are stored systematically in hard copy or electronic format and are, e.g. used for: providing information on the possible origin of objects or substances found in casework; and/or providing statistical information.
- **EDGEOSCOPY-** Study of the contour or shape of the edges of friction ridges.

❖ **EXPERT (CFPB)-** 'Expert' means an officer working in the CFPB having undergone thorough training in classifying, recording & searching of F.P. Slips and examining of latent and documentary prints either in any State Bureau or at the Central Finger Print

Bureau and having a Finger Print expert certificate by clearing the All India Board for Examination of Finger Print Experts.

- ❖ **EXEMPLAR**- An impression or image of friction ridge skin purposely collected with the knowledge of the subject. 2: The prints of an individual associated with a known or claimed identity deliberately recorded electronically, by ink, or by another medium (also known as known prints). (SWGFAST 2011)
- ❖ **ELIMINATION FINGERPRINTS**-Finger Print images taken from persons with legitimate access to evidence under examination for latent fingerprint. 2: Exemplars of friction ridge skin detail of persons known to have had legitimate access to an object or location.
- ❖ **GRAY-SCALE IMAGE** -An image using more than two radiometric values, i.e., 256 shades of gray in an 8-bit image. Not a strictly black/white image.
- ❖ **HENRY CLASSIFICATION**- an alphanumeric system of Finger Print classification named after Sir Edward Richard Henry used for filing, searching, and retrieving ten-print records.
- ❖ **FINGER PRINT SLIP FOR RECORD**- The form containing 10-digit rolled impressions and plain prints taken in proper sequence for record with particulars regarding name, parentage, residence, conviction, etc. of a convict is called a Finger Print Slip for record.
- ❖ **FINGER PRINT SLIP FOR SEARCH**- Similar form with 10 digit impressions when used for search to trace previous conviction from the record of the Bureau is called Finger Print slip for search.
- ❖ **INKED FINGER PRINT**- the Intentional recording of the friction ridge skin. Using black printer's ink and a Finger Print roller, the ridge characteristics of a particular individual, can be formally recorded on a standard Finger Print card.
- ❖ **INTERPOL**- Originally the International Police Commission, established in 1923 with the first headquarters in Vienna, Austria. With the General Secretariat now in Lyon, France, Interpol focuses on international crimes that threaten public safety, especially those involving terrorism, criminal organizations, drugs, finances and technology, and trafficking in human beings, and provides fugitive investigative support.
- ❖ **LATENT (Chance print)/LATENT SEARCH**- A search of a latent print against other latent prints, which are usually stored in the Unsolved Latent File, and which has the potential to link crimes committed by same person, even though that person is as yet unidentified. Also referred to as a latent/unsolved latent search.
- ❖ **LIVESCAN**- “Live scan” is an electronic biometric platform for capturing, storing and

transmitting friction ridge detail.

- ❖ **MINUTIAE DATA-** The data representing the relative position, orientation, and in some cases, the relationship and/or types of the minutiae in a Finger Print image.
- ❖ **NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY-** Formerly known as the National Bureau of Standards, this division of the U.S. Department of Commerce ensures standardization in non-defense government agencies.
- ❖ **PATTERN CLASSIFICATION-** Characterization of a Finger Print as containing one of seven Finger Print patterns: arch, tented arch, right-slant loop, left-slant loop, whorl, amputation, or scar. The Integrated Automated Finger Print Identification System will provide for both pattern level and Henry classifications.
- ❖ **SCANNER-** Capture device to create a digital image. New scanners that connect to the Finger Print Work stations must meet the standards outlined in Appendix F of the Electronic Biometric Transmission Specification.
- ❖ **SPECIAL AND LOCAL LAWS-** These are Acts that are framed by the state government for specific issues.

TEN-PRINT- A Finger Print card (or Finger Print card equivalent) containing rolled and plain impressions from the ten fingers of an individual. The standard format contains 14 impressions: one rolled Finger Print impression of each finger, plain Finger Print impressions of each thumb, and plain impressions of the four fingers of each hand simultaneously.

- ❖ **TEN-PRINT IMAGE SEARCHES-** An electronic transaction submitted to the Central/State Finger Print bureau's data base, which contains fingerprint images, classification information as required by the Automated Fingerprint Identification System, or remotely extracted fingerprint characteristics. The subsequent search will be conducted automatically with no additional manual editing or processing. If candidates are identified, the candidates' PIN Numbers are returned to the transmitting agency along with fingerprint images from the highest scoring candidates.
